Farah Farhat

QA Tester | Ensuring Quality Through Precision and Analysis

0940225467 **@ farahfarhat033@gmail.com** **LinkedIn** **Rural Damascus**

Summary

Dedicated Manual Software Tester with strong attention to detail and experience in executing test cases, identifying defects, and ensuring high-quality software delivery. Skilled in regression, UI, and exploratory testing with familiarity in Agile environments and bug-tracking tools such as Jira. Passionate about improving product quality and collaborating with development teams to deliver reliable and user-friendly applications.

Experience

Sunrise IT – Rural Damascus, Syria | Manual Quality Assurance (QA) Tester | April 2025 – April 2026

- Developed and executed **manual test cases** for new features and updates, ensuring coverage of all key user scenarios.
- Performed **regression testing** to verify that existing features were not affected after bug fixes or new feature implementations.
- Conducted **UI testing** to ensure all interface elements functioned correctly and smoothly, with compatibility across different browsers and devices.
- **Performed exploratory testing with high efficiency to discover new issues, analyze them, and document results for the development team, with the ability to identify gaps and effectively improve product quality.**
- Logged and tracked bugs in **Jira**, collaborating with developers to reproduce issues and confirm fixes.
- Participated in daily sprint meetings, planning, and reviews within an **Agile environment**, collaborating with cross-functional teams to enhance product quality.
- Analyzed problems encountered during testing, identified root causes, and proposed effective solutions to ensure smooth processes and improved final product quality.
- Contributed to improving testing methodologies, accelerating bug detection, and enhancing overall product quality.
- **API Testing:** Familiar with API testing using **Thunder Client** and **Postman (basic to intermediate knowledge)**, including sending requests, inspecting responses, and validating endpoints

Ministry of Health – Directorate of Digital Transformation – Damascus, Syria | Volunteer Manual Quality Assurance (QA) Tester | April 2026 – Present

- Executed manual testing for new features and enhancements in digital healthcare systems.
- Identified, documented, and reported defects, providing clear bug reports to the development team.
- Performed retesting and regression testing after bug fixes to verify issue resolution and system stability.

- Collaborated with developers and team members to ensure software quality and improve user experience.
- Verified system functionality against requirements and expected user workflows.

Key Projects / Portfolio

- Applied all practical testing skills on the following projects:
- Losgo Mobile App & Web Platform: **Passenger and parcel delivery app with multiple user roles, admin dashboards, and payment integration.**
- Daleeli Mobile App, Website & Admin Panel: **Multi-role classified ads system covering mobile, web, and backend dashboards.**
- Itlob Yalla (Delivery App): **Comprehensive delivery application with admin panel.**
- My Home Style (E-commerce Platform): **Online store platform including website and admin panel.**
- Dalilуna Educational App: **Multi-level paid course platform covering provinces, institutes, subjects, and educational roles.**
- School Automation Apps: **Web and mobile platforms with multiple roles and dashboards for educational management.**
- Clinic Website & Admin Panel (Dr. Mira Bakri): **Website and admin panel for clinic management and operations.**
- Virtual Schools System: **Comprehensive platform connecting students, teachers, and administration digitally, including all roles and dashboards.**

Education

● Syrian Virtual University – Bachelor's Degree in information Technology (BAIT)

Information Systems and Networks (ISDN Track) – Ongoing, Fourth Year

● Damascus University – Technical Computer College(TCC)

Software Engineering – Graduated 2022

Skills

Technical Skills:

- Manual Testing
- Regression Testing
- UI Testing
- Exploratory Testing
- API Testing: familiar with Thunder Client and Postman (basic knowledge), validating endpoints
- Bug Tracking Tools: Jira
- Agile Methodology
- Understanding of Software Testing Life Cycle (STLC)
- Understanding of Software Development Life Cycle (SDLC)
- Web Design: HTML, CSS, JavaScript (Basics)
- Programming: C# (Basics & OOP), PHP (Basics), Laravel
- Databases: SQL, PL/SQL, T-SQL – queries and database management
- Software Tools: Microsoft Office, Visual Studio Code, SQL Server

Soft Skills:

- Problem Solving
- Quick Learning
- Teamwork and Collaboration
- Adaptability
- High Communication Skills

Languages:

English: Intermediate

Arabic: Native
